# Aletta invites you

On Thursday the 15th of March, it's finally happening. After intensive preparations, we will officially launch the Aletta Jacobs School of Public Health. Together with you!

On that memorable day, our joint commitment for a healthier society will get its final form. And, of course, you are more than welcome to be there with us.

It promises to be an inspiring event for everyone who is – or wants to be – part of the health movement in the northern Netherlands and beyond.

We hope to see you on March 15!  
**The Aletta Team**

## Aletta's themes

With these themes in mind, we set out for the fulfilment of our dream: 'Thought for action; Together for more healthy years'.

### **We are Aletta. Are you Aletta too?**

Do you want to make your specific knowledge and skills work for the Aletta Jacobs School of Public Health? Contact us at [aletta@rug.nl](mailto:aletta@rug.nl).

However, we cannot do this alone. That is why we want to connect all initiatives that are related to 'Healthy Ageing'. The Aletta Jacobs School of Public Health is not only occupied with multidisciplinary research and education, but also – especially – on creating integral collaborations.

So, on March 15th, we celebrate not only the founding of Aletta, but also the official start of the healthiest movement in the northern Netherlands. A movement in which research, organisations, governments and individuals work together on their way to more healthy years!
