

Join the **DTL Communities@Work** conference
on **2 October 2018**
in **Jaarbeurs Utrecht**

featuring **lectures, poster presentations, partner and sponsor booths, networking activities** and **workshops** on

value cases of the **Personal Health Train**
modelling human metabolism

digital **infrastructure** for **cross-omics** projects
research data management in practice
lab in the clouds

how to make **FAIR software**

building a **training curriculum** for FAIR data stewardship

key success factors of **public-private partnerships**

improving **software reproducibility**

keynote speakers

C. Titus Brown (University of California, Davis)

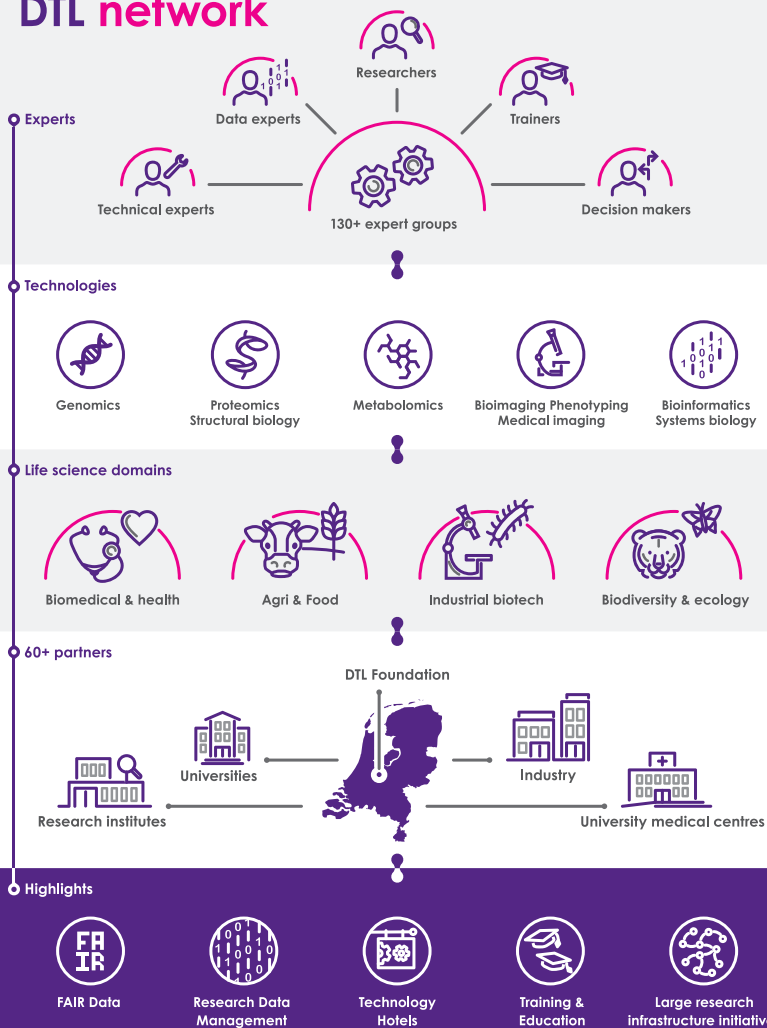

George Kowalchuk (Utrecht University)

www.aanmelder.nl/dtl2018

DTL Communities@Work 2018 is organised by DTL in collaboration with:

DTL network

www.dtls.nl

DTL is a public-private partnership of more than 60 Dutch life science organisations. It acts as a network of professionals that jointly improve the Dutch life science research infrastructure, with a focus on FAIR data treatment, accessible high-end technologies, and expert training. DTL collaborates with related international initiatives, e.g., it hosts the Dutch node of ELIXIR (the European data infrastructure for the life sciences)
