

Coordinating Action Systems Medicine
Implementation of Systems Medicine across Europe

CASyM 2nd Academic/Industry Interaction Workshop

Round tables and flash presentations

Systems medicine: Influence the H2020 calls & Find the right partners

Date: April 14th, 2015

Place: Isara, 23 Rue Jean Baldassini, 69364 Lyon, France

CASyM (Coordinating Action Systems Medicine) is a European project, supported by the FP7-Directorate-General for Research and Innovation of the European Commission, to develop a road map outlining an integrative strategy for the implementation of systems medicine across Europe. This roadmap is used by the European Commission to help define the calls of its Horizon 2020 program. The CASyM roadmap is updated thanks to the output of a series of workshops (2012-2016). More information at <https://www.casym.eu/>

The purpose of the event is:

- ✓ To provide visibility on innovation projects and initiatives, and technologies in link with systems medicine,
- ✓ To help build long-term collaborations between public and private partners on this subject,
- ✓ To update the roadmap toward systems medicine implementation in Europe.

The event is organized around 2 main sessions:

- ✓ In the morning, brainstorming round tables set up in parallel and driven by leading clinicians
- ✓ In the afternoon Flash presentations of collaborative projects ideas

Targeted participants: Academics research teams, clinicians, SMEs, Industrial large groups, patients organizations, **from all over Europe** are invited to participate. Please note that the number of attendees will be limited and based on profile selection.

Registrations are open on until April 7th 2015, 5:00 p.m.
