

Massachusetts

Massachusetts is the world's leading hub for life sciences. It is home to a thriving life sciences community, renowned universities and hospitals that are global leaders in biotech research, and the most highly educated workforce in the US. Massachusetts is the perfect breeding ground for both small and large biotechnology companies to flourish.

The Netherlands

The Netherlands provides a key location for life science businesses. The dynamic and thriving Dutch Life Sciences & Health sector is characterised by outstanding clusters and world-class universities with a long history of strategic partnerships that link science, industry and government. As the home to 3,100 innovative life sciences companies, of which 420 biopharmaceutical companies, and the European Medicines Agency, the Netherlands is one of the most concentrated Life Sciences & Health clusters in the world.
