Dear Women's Health innovator,

We are delighted to share this exclusive opportunity for you to join the Women's Health innovation mission to the Netherlands.

This program is designed for U.S.-based innovators, researchers, entrepreneurs & thought leaders in Women's Health & FemTech.

This innovation mission to the Netherlands is organized by a partnership consisting of the Dutch government and leading organizations in life sciences & health and biotech. The Netherlands is at the forefront of Women's Health innovation in Europe (and the world) and aims to advance women's health by fostering collaboration, accelerating research, and driving breakthrough solutions that shapes the future of women's health globally.

Interested in joining and want to learn more? Reach out to nin@nost-boston.org to express your interest!

Why the Netherlands?

This immersive, four-day program provides unparalleled access to cutting-edge expertise, world-class facilities, and strategic partnerships in Women's Health.

In only **4 days**, you will:

1

Gain insights into Dutch & EU health innovation landscape, including the launch of a national Women's Health strategy by the Ministry of Health, Welfare & Sport

2

Explore collaboration opportunities with startups, corporates, R&D centers & investors active in reproductive health, diagnostics, data & personalized care

3

Participate in Innovation for Health, Europe's leading health innovation conference, and join the Women's Health session to pitch your solutions to a global audience

4

Meet leading researchers working on interdisciplinary & inclusive women's health solutions, such as Erasmus MC, Amsterdam UMC, Health & Innovation District, TNO & more

5

Experience dynamic workshops, field visits and exclusive networking events with key government and industry stakeholders
