

Active in digital healthcare and interested in the Japanese market?

Don't miss the Economic Life Sciences & Health Mission to Japan and Expo 2025 Osaka!

When
22 - 28 June 2025

Where
Osaka & Tokyo

Register before
Wed, 26 Feb '25

Costs
€ 950 per organisation

The Netherlands is a pioneer in cutting-edge digital health solutions, ranging from AI-powered diagnostics and telemedicine services to data infrastructures like Health-RI.

In Japan, we will showcase these innovations and explore synergies with Japan's advanced technological landscape. Together, we can accelerate the digital health revolution and make accessible, personalised care a reality.

By participating in this LSH mission, you will:

- Take part in B2B matchmaking sessions;
- Gain insights into the Japanese market, developments, and requirements;
- Take part in ecosystem sessions;
- Visit i.a. Tokyo University and Biocommunity Kansai (BioCK)
- Showcase your innovations and explore collaborations with Japan's advanced technological landscape;
- Explore the Dutch pavilion at Expo 2025 and the Japan Health Fair.

Japan offers many opportunities for Dutch organizations active in:

E-health platforms

AI diagnosis and predictive analytics

Virtual Reality/
Augmented Reality

Telemonitoring

Personal health dashboards

Cybersecurity in healthcare

Did you know?

In addition to digital healthcare, the following subjects are also part of this mission:

healthy aging, regenerative medicine, and sports & vitality.
