

Active in regenerative medicine and interested in the Japanese market?

Don't miss the Economic Life Sciences & Health Mission to Japan and Expo 2025 Osaka!

When	Where	Register before	Costs
22 - 28 June 2025	Osaka & Tokyo	Wed, 26 Feb '25	€ 950 per organisation

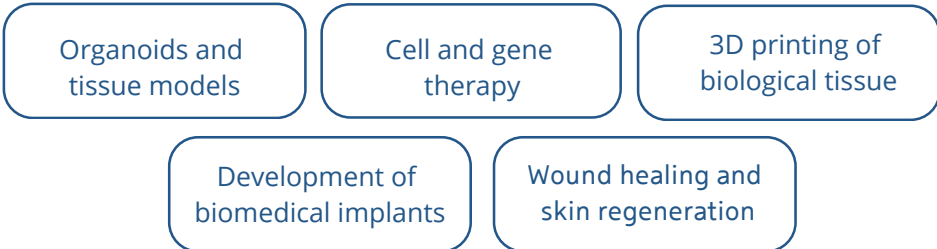

Regenerative medicine holds immense promise to transform healthcare by repairing damaged cells, tissues, and organs. The Netherlands fosters a robust ecosystem in this field, where translational research merges with the innovative endeavors of industry, exemplified by platforms like Regmed XB, High Tech NL, and NXTGEN Hightech and at the various (bio) science parks in The Netherlands. Japan boasts top-class researchers with a history of groundbreaking discoveries, including the technology to develop stem cells from adult human cells in the laboratory. Furthermore, Japanese innovation hubs like Nakanoshima Cross bring together industry and research.

By uniting our expertise, we can accelerate research, knowledge implementation, and ultimately, patient care. Join us and gain insight into the Japanese market, innovation ecosystem and collaboration opportunities.

By participating in this LSH mission you will:

- Engage in (B2B) matchmaking sessions and roundtables about innovative R&D-, regulatory frameworks and translational research with Japanese stakeholders;
- Discover the latest in regenerative medicine during your visit to leading facilities in Osaka and Kyoto;
- Gain insight into the Japanese market, developments, and requirements;
- Explore the Dutch pavilion at Expo 2025 and the Japan Health Fair.

Japan offers many opportunities for Dutch organizations active in:

Did you know?
In addition to regenerative medicine, the following subjects are also part of this mission: **healthy aging, digital healthcare, and sports & vitality.**
