Smart monitoring, safer care

## Help us save lives lost to unrecognised deterioration

A consortium of five academic hospitals is challenging the European industry to find a wearable, wireless and smart solution to monitor patients in the ward and at home.

**Nightingale has released a tender to develop the 'ultimate patient monitor' in a pre-commercial procurement setting.**

Interested parties can access the tender at [www.nightingale-h2020.eu/tender-documents](http://www.nightingale-h2020.eu/tender-documents)

The deadline for submission of tenders is 12<sup>th</sup> January 2018.
