The module Clinical Development at Paul Janssen Futurelab Leiden provides learning-by-doing training to ambitious postgraduate biomedical researchers. During this program, you will further your career and increase your knowledge on the optimal development of novel medical interventions, using real life cases. **Ready to go on-campus?**

PAUL
JANSSEN
FUTURE
LAB™/
LEIDEN

Paul Janssen Futurelab Leiden is an international blended learning (online and on-campus) training program for entrepreneurial biomedical professionals.

www.pauljanssenfuturelab.eu

Online

In this five-week online Futurelab course, you are introduced to the question-based method of clinical development. This approach, which is based on the so-called Real Options Theory, facilitates the rational and efficient design of a pathway for developing novel medical interventions. You will learn how to apply this approach; how to formulate key questions; and how to optimally deal with risk and costs in development. It is possible to take this online course as a stand-alone course.

- ☰ 5 week online course
- ☑ Online exam

On-campus + online

This 4-day On-campus course includes the Online course. During this intensive program, you will dive head first into a myriad of advanced teaching cases based on real-world examples. Working in small groups with fellow participants, you will work on various assignments that are based on actual projects in which novel medical interventions were developed. This on-campus Futurelab course takes place in the beautiful Dutch city of Leiden, which is only a 20-minute train ride from Schiphol Airport and close to Amsterdam.

- 📍 4 day On-campus

On-campus Extended + online

This 9-day On-campus Extended course includes both the 4-day On-campus and the Online course. In this extended program, you will work with a mentor (a clinical expert) to develop your own clinical trial based on the brief pre-proposal that you submitted with your application. In addition, your mentor will guide you through the scientific and practical challenges associated with drafting a clinical trial application. This on-campus Futurelab course also takes place in Leiden.

Online alumnus

"I was impressed with the versatility of the learning environment. The mix of texts, PDFs, videos, questions and assignments worked wonderfully well!"

Average rating

On-campus alumnus

"As I hoped, the on-campus course was great. I feel very fortunate to have worked with this group of participants since we were all very dedicated, open and sharing with a broad background and expertise."
